

Checklist for Science Renzulli Project #1

Please be prepared to hand in your final project on **Monday September 29th**. Use the checklist below to make sure you have all parts of your project on Monday. PLEASE staple the items below in order BEFORE you come to school. This will save me a lot of time and help you make sure you are not leaving anything behind in your binder!

#1 is on top and #5 is on the bottom.

- ☐ 1. Blurb and Photo (QR code attached under blurb if you have one)
- ☐ 2. Printed Project (Please get to a library or a friend's house before Monday if you cannot print from home)
- ☐ 3. Bibliography
- ☐ 4. Rough draft of Prompts (handout)
- ☐ 5. Renzulli packet with rubric inside

See next page/back for QR Code instructions.

How to generate a QR Code

1. Go to qrstuff.com
2. Choose “website url.”
3. If you have a:
 - a. document: please upload it to Google Drive and copy and paste the link into the website url field.
 - b. prezzi: copy and paste the link to your prezzi into the website url field
 - c. movie: upload your movie to vimeo with private settings and copy and paste the link into the website url field
4. You can choose the color of the code if you have a color printer. (we only have black and white in our classroom!)
5. Download the QR code that is generated. Either print it and physically copy and paste it onto your blurb or insert the digital image into your document on the computer.

If this is not something you can do right now, don't worry-we'll “play” with this technology at a later time and everyone will learn! For now just make sure your printed project is ready to hand in on Monday the 29th.
